The global ESD PCB Rack market size is predicted to grow from US\$ 722 million in 2025 to US\$ 1007 million in 2031; it is expected to grow at a CAGR of 5.7% from 2025 to 2031.

ESD PCB Rack is a universal rack for handling and processing PCB boards. ESD PCB Rack is specially manufactured with carbon loading characteristics to provide complete ESD protection for sensitive electronic components such as printed circuit boards. These conductive frames provide a conductive path to ground, making them suitable for use in static-controlled areas. In short, they are a very convenient method of storing and transporting circuit boards in assembly areas where static electricity needs to be controlled.

According to our Semiconductor Research Center, the global total output value of PCB was about US\$ 81 billion in 2022. With strong drivers from new technology, such as AI, 5G and new energy vehicles, it is estimated that the PCB industry will continue to grow steadily in the next six years. Global PCB manufacturers are mainly located in China mainland, China Taiwan, Japan, South Korea, Europe and the United States. Among them, Chinese local PCB companies hold the biggest share.
