The global ESD-safe Barcode Readers market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

ESD-safe barcode readers are electronic devices designed to read barcodes while providing protection against electrostatic discharge (ESD). Electrostatic discharge is the sudden flow of electricity between two objects with different electric potentials, and it can potentially damage or disrupt sensitive electronic components. ESD-safe barcode readers are engineered to prevent ESD-related damage while effectively scanning and decoding barcode information. These devices are commonly used in environments where static electricity poses a risk to electronic equipment and components.

ESD-safe barcode readers have been incorporating advanced scanning technologies, such as laser, linear imager, 2D imager, and RFID (Radio-Frequency Identification) for more accurate and versatile scanning capabilities.
