Abstracts

The global Ethernet-over-Coax Extenders market size is predicted to grow from US$ 545 million in 2025 to US$ 888 million in 2032; it is expected to grow at a CAGR of 7.4% from 2026 to 2032.

In 2024, global Ethernet-over-Coax extender output reached about 17.8 million units, supported by an installed production capacity of roughly 21 million units, with average unit price USD 30, and manufacturers achieving an average 34% gross margin. Ethernet-over-Coax (EoC) Extenders are networking devices that transmit IP data, PoE power, and high-bandwidth Ethernet signals over existing coaxial cables (RG59/RG6/RG11), allowing users to upgrade analog CCTV or legacy coax infrastructure to modern IP networks without rewiring; the supply chain begins with upstream semiconductor components (PHY chips, Ethernet transceivers, PoE controllers, DC-DC converters), RF/coax interface components (baluns, impedance-matching transformers, surge-protection ICs), metal housings, and PCB substrates, which are supplied to OEM manufacturers who design and assemble the extenders through SMT lines, firmware integration, and compliance testing (EMC, ESD, surge); downstream, products move through distributors, security-system integrators, and installers into end-use markets such as video surveillance, industrial networking, smart-building retrofits, and transportation systems, where they enable long-distance IP connectivity over existing coax runs up to 1–3 km.

United States market for Ethernet-over-Coax Extenders is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Ethernet-over-Coax Extenders is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
