The global Ethyl Acetate Solvent market size is predicted to grow from US\$ 3471 million in 2025 to US\$ 4819 million in 2032; it is expected to grow at a CAGR of 4.9% from 2026 to 2032.

Ethyl acetate solvent has good solubility, moderate volatilization rate, and low toxicity, and is widely used to dissolve resins, inks, coatings, adhesives, and various organic chemicals. This type of solvent is usually prepared by esterification of acetic acid and ethanol, and has the characteristics of transparency, low odor, and fast drying speed.

The main use of ethyl acetate is as a solvent, especially in the coatings and ink industries where it dominates.

Coating industry: It is the main solvent for nitrocellulose paint (NC paint), polyurethane paint (PU paint), epoxy resin paint, etc. Its high volatility helps the paint to form a film quickly, while its good solubility ensures that the resin is evenly dispersed, making the paint film smooth and even. It is commonly used in furniture paint, car repair paint, plastic coatings, etc.

Ink industry: As a key solvent for flexographic printing ink and gravure printing ink, it is used for food packaging, plastic bag printing, etc. Its fast drying characteristics are suitable for the needs of high-speed printing.

Adhesive industry: It is an important solvent for producing versatile adhesives, plastic adhesives, etc., which can effectively dissolve various organic materials.

In 2025, global Ethyl Acetate Solvent production reached approximately 4,463 K MT, with an average global market price of around US\$ 795 per ton.

The annual production capacity of ethyl acetate solvent is 6000 tons, with a gross profit margin of about 15%.

Upstream: mainly including ethanol, acetic acid, and related petrochemical or biological fermentation materials.

Midstream: An ethyl acetate solvent production enterprise that produces products of different purity levels through esterification reactions and distillation purification processes, and supplies them to the solvent market.

Downstream: mainly used in industries such as coatings, inks, adhesives, electronic chemicals, and cleaning agents, among which coatings and printing inks are the most important consumer areas.

Raw material costs account for approximately 70% -80%, energy and utility costs account for approximately 8% -12%, manufacturing and equipment depreciation costs account for approximately 5% -8%, and logistics and sales expenses account for approximately 5% -7%.

United States market for Ethyl Acetate Solvent is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Ethyl Acetate Solvent is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
