## Abstracts

The global EV New Energy Wheel Loader market size is predicted to grow from US$ 1205 million in 2025 to US$ 3719 million in 2032; it is expected to grow at a CAGR of 17.7% from 2026 to 2032.

The EV new energy wheel loader is a type of wheel-based loading equipment that replaces the traditional diesel engine, fuel system, and certain mechanical transmission components with a power battery, electric drive motor, electronic control system, and electro-hydraulic actuation system. Typically powered by lithium-ion or lithium iron phosphate (LFP) batteries, it utilizes electric motors to independently drive the propulsion system and hydraulic working mechanisms. This configuration delivers zero tailpipe emissions, low noise and vibration levels, rapid power response, and reduced maintenance requirements. Applications span municipal sanitation, landscaping, agriculture and animal husbandry, warehousing and indoor material handling, building and road construction, sand and aggregate processing, coal and power plant fuel yards, iron and steel metallurgy, port bulk cargo handling, recycling operations, and auxiliary mining tasks. The upstream supply chain primarily comprises high-strength steel, castings and forgings, aluminum alloys, battery cells and packs, BMS units, motors, inverters, reducers, axles, hydraulic pumps and valves, hydraulic motors, tires, cabs, thermal management systems, charging interfaces, wiring harnesses, controllers, and sensors. The midstream sector focuses on complete vehicle manufacturing, with core processes including chassis and frame fabrication, electric drive system integration, battery layout and thermal management, hydraulic-electronic control coupling, vehicle control software, energy recovery strategies, charging compatibility, reliability testing, and after-sales diagnostic systems. Downstream customers include engineering contractors, equipment rental companies, mining and aggregate enterprises, ports and logistics parks, agricultural and livestock operators, municipal sanitation departments,
