Abstracts

The global Evaporative Cooling Fan Rental market size is predicted to grow from US$ 473 million in 2025 to US$ 565 million in 2032; it is expected to grow at a CAGR of 2.6% from 2026 to 2032.

In 2024, global Evaporative Cooling Fan Rental reached approximately 4.7 million units, with an average global rental price of around US$ 100 per unit. An evaporative cooling fan (rental type) is a portable, high-airflow cooling unit available for short-term use, which cools the surrounding air through the natural process of evaporation. It draws in warm air, passes it through water-saturated cooling pads, and blows out cooler, humidified air — making it ideal for temporary cooling in large, open, or poorly ventilated spaces. The gross profit margin for evaporative cooling fan rentals typically ranges between 20% and 35%, depending on factors such as equipment utilization rates, rental duration, and maintenance costs. The upstream supply chain for evaporative cooling fan rental services primarily involves the procurement of evaporative cooling units from specialized manufacturers and suppliers. These suppliers typically include industrial cooling equipment manufacturers and OEM providers located in regions with advanced manufacturing capabilities, such as China, the United States, and Europe. These manufacturers produce a range of evaporative cooling fans varying in capacity, airflow design, and energy efficiency, ensuring suitability for diverse rental applications from small indoor spaces to large industrial or outdoor environments. The downstream market for evaporative cooling fan rentals spans a broad range of industries and customer segments requiring efficient, cost-effective cooling solutions. Key customers include industrial manufacturers, warehouses, agricultural facilities, construction sites, event organizers, and commercial property managers. These customers typically rent evaporative cooling fans to provide temporary cooling in large open or semi-open spaces, especially during hot seasons or for specific projects. The rental model offers

flexibility and cost savings compared to outright equipment purchase and maintenance.
