Abstracts

The global eVTOL Seats market size is predicted to grow from US\$ 6.87 million in 2025 to US\$ 48.13 million in 2032; it is expected to grow at a CAGR of 29.6% from 2026 to 2032.

eVTOL seats are cabin passenger and crew seating systems specifically designed for electric vertical takeoff and landing (eVTOL) aircraft, focusing on lightweight design, durability, and ergonomics. Compared to traditional aircraft seats, eVTOL seats must meet higher weight optimization requirements to improve the range and efficiency of the electric propulsion system, while also meeting the comfort and safety standards of short-haul urban air traffic. These seats are typically manufactured using materials such as high-strength aluminum alloys, titanium alloys, and high-performance composite materials, combined with a modular design for rapid installation, certification, and maintenance. In 2025, the global production of eVTOL seats is estimated at approximately 1,080 units, with an average price of approximately US\$6,500 per unit and a gross profit margin of approximately 30%.

With accelerating global urbanization and deepening traffic congestion, Electric Vertical Takeoff and Landing (eVTOL) aircraft, as part of Advanced Air Mobility (AAM), are rapidly moving from the concept stage to practical operation. As a crucial component of the aircraft, eVTOL seats are increasingly becoming a core product of interest for both aerospace interior manufacturers and eVTOL manufacturers, driven by factors such as lightweight design, electric energy efficiency, and improved passenger experience. A prime example is that leading seat suppliers are collaborating with eVTOL manufacturers to develop dedicated seats that integrate advanced composite materials and ergonomic design, achieving a balance between lower weight and superior comfort, thus creating new market opportunities for seat manufacturers.

Despite the promising market prospects, this field still faces technological and market

challenges. High technical certification thresholds are a core issue. eVTOL seats must meet the stringent strength, fire resistance, and impact testing requirements of aviation regulatory agencies, with manned airworthiness certification requiring seats to withstand overloads up to 30g. The range and payload limitations of electric aircraft themselves force seat manufacturers to make extreme trade-offs between weight and function. On the supply chain side, the traditional aviation seat industry's capacity and production processes are largely geared towards large passenger aircraft orders. Seat suppliers need to adjust production lines and adopt new materials and processes to meet the small-batch, rapidly iterating demands of eVTOL. Furthermore, varying market maturity may lead to discrepancies in demand expectations and extended investment return cycles.

As eVTOL commercialization approaches, segmented demands such as passenger transport services, air taxis, emergency medical transport, and high-end business travel continue to emerge, placing higher demands on seat comfort, modular configuration, and rapid replacement capabilities. Passenger experience has expanded from safety and seat functionality to comprehensive indicators such as cabin space optimization, shock absorption, and noise control, driving manufacturers to develop smarter, lighter seat products. In the future, with the maturation of autonomous driving and drone technologies, seats may integrate more interactive and safety sensing functions, further stimulating market innovation and growth. Achieving domestic production of core components for aircraft seats, such as carbon fiber and aluminum alloys, can sustainably reduce costs. Lightweight products are suitable for the weight-sensitive eVTOL industry, and seat manufacturers have significant advantages in terms of initial qualifications and subsequent cost control.

LP Information, Inc. (LPI) ' newest research report, the "eVTOL Seats Industry Forecast" looks at past sales and reviews total world eVTOL Seats sales in 2025, providing a comprehensive analysis by region and market sector of projected eVTOL Seats sales for 2026 through 2032. With eVTOL Seats sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world eVTOL Seats industry.

This Insight Report provides a comprehensive analysis of the global eVTOL Seats landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on eVTOL Seats portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global

eVTOL Seats market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for eVTOL Seats and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global eVTOL Seats.

This report presents a comprehensive overview, market shares, and growth opportunities of eVTOL Seats market by product type, application, key manufacturers and key regions and countries.

Segmentation by Type:

Basic Functionality

Luxury Functionality

Segmentation by Weight:

Ultra?Light (

Contents

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview

- 2.1.1 Global eVTOL Seats Annual Sales 2021-2032

- 2.1.2 World Current & Future Analysis for eVTOL Seats by Geographic Region, 2021, 2025 & 2032

- 2.1.3 World Current & Future Analysis for eVTOL Seats by Country/Region, 2021, 2025 & 2032

2.2 eVTOL Seats Segment by Type

- 2.2.1 Basic Functionality

- 2.2.2 Luxury Functionality

- 2.2.3 eVTOL Seats Sales by Type

- 2.2.3.1 Global eVTOL Seats Sales Market Share by Type (2021-2026)

- 2.2.3.2 Global eVTOL Seats Revenue and Market Share by Type (2021-2026)

- 2.2.3.3 Global eVTOL Seats Sale Price by Type (2021-2026)

2.3 eVTOL Seats Segment by Weight

- 2.3.1 Ultra?Light (
