The report requires updating with new data and is sent in 48 hours after order is placed.

The texture of exfoliating gloves is similar to that of a loofah or a dry brush, yet they fit over hands like a pair of warm winter mitts. They exfoliate the skin by gently peeling away old, dead skin cells by rubbing the dual-sided textured or single-sided textured gloves over the skin. These gloves are frequently used to remove dead skin and as an anti-aging treatment. An increased production capacity among market participants is expected to enhance product accessibility, resulting in better product consumption.
