## Abstracts

The global Exhaust Manifolds and Risers market size is predicted to grow from US$ 3334 million in 2025 to US$ 4411 million in 2032; it is expected to grow at a CAGR of 4.2% from 2026 to 2032.

Exhaust manifolds and risers are essential components in marine engines, responsible for directing and cooling exhaust gases to protect the engine. The exhaust manifold gathers exhaust gases from each cylinder and channels them into a single stream. In marine engines, it is typically water-cooled to prevent overheating. The exhaust riser, attached after the manifold, raises the exhaust path, preventing water backflow into the engine?a crucial feature for marine applications to avoid engine damage. Together, these parts ensure efficient exhaust expulsion, reduce engine temperature, and protect against corrosion. Regular maintenance is required as exposure to saltwater and exhaust gases can lead to corrosion over time.

United States market for Exhaust Manifolds and Risers is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Exhaust Manifolds and Risers is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
