Exhibit design refers to the process of planning and creating visual and spatial experiences for exhibitions, fairs, museums, commercial events, etc. It covers the overall layout, visual communication, interactive elements and visitor movement design, aiming to effectively convey brand or theme information, attract audiences and increase participation. This report focuses on the exhibit design market.

Market drivers: Unique design improves recognition, and visitors judge the strength of enterprises through booths. Global demand, the Asia-Pacific market is growing rapidly, and localized design is the key. Environmental protection trends require sustainable materials, and modular design reduces costs.

Main challenges: Rising construction costs, SMEs turn to shared booths. Insufficient data utilization, only a few companies can effectively integrate exhibition data with CRM systems. Compliance risks, new EU fire protection regulations, etc. increase the cost of material and structure certification.
