The global Expectorant Drug market size is predicted to grow from US\$ 361 million in 2025 to US\$ 580 million in 2032; it is expected to grow at a CAGR of 7.2% from 2026 to 2032.

Growing Respiratory Disorders: With increasing pollution levels, smoking habits, and respiratory infections, the prevalence of respiratory disorders such as bronchitis, COPD (Chronic Obstructive Pulmonary Disease), and asthma is rising globally. This drives the demand for expectorant drugs as they help in clearing mucus from the respiratory tract. **Preference for Natural Remedies:** There's a growing trend towards natural and herbal expectorants as people become more health-conscious and seek alternatives to conventional medication. This trend might impact the market share of synthetic expectorants. **Technological Advancements:** Pharmaceutical companies are continuously investing in research and development to introduce more effective and safer expectorant formulations. This includes innovations in drug delivery systems to enhance the efficacy and convenience of expectorant medications.
