The global Explosion Proof Dome Network Camera market size is predicted to grow from US\$ 279 million in 2025 to US\$ 412 million in 2032; it is expected to grow at a CAGR of 5.5% from 2026 to 2032.

Explosion-proof dome network cameras are industrial-grade network cameras with a spherical shape and explosion-proof certifications such as ATEX and IECEx. They integrate a pan-tilt structure and an explosion-proof housing, enabling horizontal and vertical rotation as well as partial zoom monitoring. Explosion-proof dome network cameras are widely used in large-scale inspections and key area monitoring in flammable and explosive environments, such as petrochemical, natural gas, chemical, LNG receiving terminals, offshore platforms, coal mines, power plants, hazardous chemical storage areas, and hazardous pharmaceutical processing areas. It is estimated that by 2025, global sales of explosion-proof dome network cameras will reach approximately 78,000 units, with an average unit price of approximately US\$3,650 and a capacity utilization rate of approximately 70%. Upstream suppliers mainly include image sensor, module lens, pan-tilt motor and driver, industrial-grade main control board, explosion-proof stainless steel or aluminum alloy housing, sealing and corrosion-resistant materials, power supply and PoE modules, network chips, and embedded software suppliers. Downstream suppliers include oil and petrochemical engineers, chemical park integrators, offshore and energy system integrators, and mining automation manufacturers. The gross profit margin for pharmaceutical and fine chemical companies, as well as industrial security system integrators, is approximately 38%. The product cost structure is as follows: explosion-proof spherical enclosures and universal joint structural components account for approximately 28%; image sensors and lens modules account for approximately 17%; main control and network processing units account for approximately 15%; universal joint motors and drive modules account

for approximately 10%; explosion-proof certification and testing account for approximately 10%; software and firmware development account for approximately 6%; assembly and labor account for approximately 6%; and logistics and management costs account for approximately 8%. The demand list mainly includes inspections of refinery and chemical plant areas and storage tank areas; inspections of liquefied natural gas and oil and gas loading and unloading areas; inspections of chemical reaction areas and hazardous process areas; inspections of coal mine shafts and transfer stations; inspections of offshore platforms and dock areas; and inspections of substations and hazardous operation areas. Downstream customers include international oil and gas companies, CNPC, Sinopec, CNOOC, large chemical groups, marine engineering companies, mining groups, leading pharmaceutical companies, and industrial security system integrators. Increasingly stringent safety regulations and regulations on hazardous chemicals, increased fixed asset investment in the energy and chemical industries, upgrades to gimbal and high-magnification zoom technologies, and improved AI-powered video inspection and remote maintenance capabilities have all created new business opportunities. This also reflects changing consumer demands for wider coverage, less manual inspection, and higher reliability.

Explosion-proof dome network cameras are upgrading from basic remote inspection to high-magnification zoom, intelligent patrol, and AI-assisted recognition. In high-risk industries such as energy and chemicals, coverage and automatic inspection capabilities have become core procurement indicators. With the strengthening of safety supervision and rising labor costs, manufacturers with highly reliable PTZ structures, comprehensive corrosion and explosion-proof systems, and support for AI video inspection and centralized operation and maintenance platforms will obtain higher added value and more stable and continuous income in large-scale projects and long-term operation and maintenance contracts.
