Explosion proof conduit is a device used to protect electrical wiring and equipment from explosion or fire hazards. It is usually made of corrosion-resistant, explosion-proof materials and is designed to safely route electrical equipment and wiring in environments with flammable gases, liquids or dusts. Explosion-proof ducts can effectively prevent fires or explosions caused by sparks or arcs, and reduce the harm of explosions to the surrounding environment and personnel. Explosion-proof ducts usually have a certain explosion-proof level. According to the explosion risk of the environment and the required safety standards, the appropriate explosion-proof level duct is selected.

The global Explosion-proof Duct market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
