Explosion-proof Freezers are special refrigerators, mainly used in special environments, to store dangerous materials that are difficult to store, volatile, flammable and explosive at room temperature, such as cooling and storing pharmaceutical reagents at lower temperatures.

The Explosion-Proof Freezers are engineered to prevent triggering an explosion inside or outside the unit. The thermostat and compressor components are isolated within a vapor-proof enclosure. All electrical connections are hardwired to prevent sparking and accidental disconnection. Explosion-proof refrigerators need to meet the standards of different application areas.
