An explosion-proof motor starter is a device specially designed for starting and controlling motors in hazardous environments. These starters have a special explosion-proof design that prevents explosions caused by sparks or high temperatures in hazardous environments such as flammable gases, steam, liquids and dusts. Explosion-proof motor starters usually use explosion-proof housings and sealing designs to prevent external harmful substances from entering the interior, and use special materials and construction to reduce the risk of sparks. They can be used in oil, natural gas, chemical, pharmaceutical, mining and other industries to ensure the safe operation of electric motors in hazardous environments.

The global Explosion-Proof Motor Starter market size is projected to grow from US\$ 1044 million in 2024 to US\$ 1373 million in 2030; it is expected to grow at a CAGR of 4.7% from 2024 to 2030.
