The global Explosion Proof Obstruction Light market size is predicted to grow from US\$ 210 million in 2025 to US\$ 295 million in 2032; it is expected to grow at a CAGR of 4.9% from 2026 to 2032.

Explosion-proof obstruction lights are aviation warning lighting devices used in flammable and explosive environments. They identify high-rise buildings, chimneys, towers, cranes, and offshore platforms through high-brightness flashing or constant red light, ensuring flight safety. The products utilize explosion-proof housings, corrosion-resistant materials, and sealed electrical structures, allowing for long-term stable operation in high-temperature, high-humidity, and corrosive environments. The upstream of the industry chain includes LED chips, explosion-proof lamp housings, stainless steel or aluminum alloy structural components, power drivers, and optical lenses; the midstream involves complete lamp manufacturing and control system integration; and the downstream is mainly used in petrochemical, natural gas, power plants, ports, airports, and large industrial facilities, with supporting installation, testing, and maintenance services. In 2025, the global production of explosion-proof obstruction lights was approximately 413,000 units, with a global average market price of approximately US\$520 per unit. The gross profit margin of major companies in the industry ranged from 25% to 45%. Global production capacity in 2025 was approximately 550,000 units.

The explosion proof obstruction light market benefits from strict industrial safety regulations and the expansion of oil, gas, and chemical infrastructure. Increasing investments in offshore platforms, storage tanks, and tall industrial structures create stable demand for certified explosion-proof lighting systems. LED technology improves energy efficiency, service life, and maintenance cycles, reducing total operating costs.

Smart monitoring and remote control functions are gradually being adopted. Overall, the market shows steady growth supported by mandatory safety compliance and replacement demand.
