The global Explosion-proof PTZ Camera market size is predicted to grow from US$ 271 million in 2025 to US$ 335 million in 2031; it is expected to grow at a CAGR of 3.6% from 2025 to 2031.

A pan–tilt–zoom camera (PTZ camera) is a camera that is capable of remote directional and zoom control. PTZ cameras make it possible to monitor large areas with a single security camera. The pan-tilt module allows you to remotely control the viewing area. Their mobile apps even give you remote control of your PTZ camera from anywhere in the world. Explosion-proof PTZ Camera has strong external protection ability and can adapt to bad weather and environment.

An explosion-proof camera is a camera specially designed for installation in hazardous environments. It has the characteristics of explosion-proof and explosion-proof, and is suitable for places where explosive gas, steam or dust exist, such as chemical plants, petroleum refineries, mines, etc. Explosion-proof cameras are designed with special materials and structures to ensure that they will not spark or explode in explosive environments. The camera is dustproof and waterproof, and can work stably for a long time in harsh environments. Explosion-proof cameras support network connection and have the basic functions of cameras, which can transmit video and audio signals through the network for remote monitoring and control. Cameras usually support high-definition images and can provide clear and detailed video surveillance. Explosion-proof cameras have good high temperature resistance and can adapt to work in high temperature environments. Camera housings and materials are typically corrosion-resistant for long-term use in chemically aggressive environments.
