A solenoid valve is an electromechanically operated valve. The valve is controlled by an electric current through a solenoid: in the case of a two-port valve the flow is switched on or off; in the case of a three-port valve, the outflow is switched between the two outlet ports. Multiple solenoid valves can be placed together on a manifold.

Explosion Proof Solenoid Valves are solenoid valves for use on actuator control applications located in hazardous areas that are required to comply with the International Electrical Commission Explosive directives or ATEX EU, North American NEC directives.

The world's leading manufacturers of explosion proof solenoid valves are Asco, Parker, Kendrion, Festo, SMC, Burkert, Norgren, CKD, Konan Electric and ODE.
