The Explosion-Proof Wheeled Robot is a mobile robotic platform designed with explosion-proof safety features. Its core design incorporates key technologies such as explosion-proof enclosures, intrinsically safe circuits, flameproof sealing structures, and electrostatic protection to ensure effective isolation between the internal electrical system and the external environment during operation in explosive gas or dust environments. This prevents potential ignition sources, such as electrical sparks or hot surfaces, from triggering explosions. Equipped with a high-strength wheeled mobile chassis and autonomous navigation and motion control algorithms, the robot achieves stable mobility in complex terrains while adhering to stringent explosion-proof standards for equipment materials, electrical clearances, and creepage distances, making it suitable for industrial scenarios with demanding safety requirements.
