The global Explosive Salt market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

In the market, common explosion salts can be divided into two types: explosion salt laundry aids and explosion salt laundry detergents. Their main feature is being phosphorus-free and chlorine-free. Whether used alone or in combination with regular laundry detergents, they can effectively remove various stubborn stains. The term 'explosion' in explosion salt refers to the fact that when it dissolves in water, it produces sodium carbonate and hydrogen peroxide. The oxygen generated from the decomposition of hydrogen peroxide accelerates the diffusion rate of sodium carbonate, which is significantly different from the conventional meaning of 'explosion.'

Using explosion salt for laundry can effectively eliminate stubborn stains on clothes while providing good protection for the color and fibers of the fabric. It is particularly suitable for washing clothes made of materials such as cotton, linen, and synthetic fibers.

United States market for Explosive Salt is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
