The report requires updating with new data and is sent in 48 hours after order is placed.

According to our LPI (LP Information) latest study, the global Express Delivery market size was valued at US\$ million in 2023. With growing demand in downstream market, the Express Delivery is forecast to a readjusted size of US\$ million by 2030 with a CAGR of % during review period.

The research report highlights the growth potential of the global Express Delivery market. Express Delivery are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Express Delivery. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Express Delivery market.

Express delivery services include delivery of parcels and documents to different customers, such as retail customers, business customers, and government agencies. The parcel and documents delivered using express delivery depend upon the weight of the parcel and the distance of the destination. Shipping charges include both, the distance of the destination and the weight of the parcel. Express delivery is a time-bound delivery, where the shipment is delivered on the same day or within 1-2 days. Express delivery service vendors provide services to deliver shipments only up to a certain distance. In addition, the vendors in this market provide value-added services for differentiating their services.

The B2B end-user segment accounted for the major shares of the express delivery

market. The provision of services such as exchange of documents, business letters, and exchange of goods and the increased dependence of the pharmaceutical and healthcare industries, will contribute to the growth of this industry segment in the coming years.
