Extended detection and response (XDR) solutions are tools used to automate the discovery and remediation of security issues across hybrid systems. These tools are capable of performing detection and response related to networks, endpoints, cloud services, and applications. Companies are adopting these technologies because most traditional detection and response solutions are limited to a single medium such as endpoint security or network security while XDR is capable of securing complex hybrid environments.

The global Extended Detection and Response (XDR) Platform market size is projected to grow from US\$ 1300.1 million in 2023 to US\$ 2716.2 million in 2030; it is expected to grow at a CAGR of 11.1% from 2024 to 2030.
