An external hard disk drive (HDD) is a portable data storage device that can be attached to a computer through a FireWire or USB connection, and is utilized for retrieving and storing digital information by using rapidly rotating disks, or platters, coated with magnetic material. In such devices, the platters are paired with magnetic heads, which read and write data on the platter surface. Capacity and performance are the primary characteristics of an external HDD.

In this market study, analysts have estimated APAC to dominate the external hard disk market during the forecast period and will occupy around 56% of the overall market share. Factors such as the presence of a large number of PC manufacturers in the region and the growing demand for a higher storage capacity will greatly aid in the growth of the market in the next four years.
