External on-load tap changer is a voltage regulating device installed on the external oil tank of a power transformer, which switches the tap under the load operation of the transformer, thereby regulating the output voltage and maintaining the stability of the grid voltage. This equipment usually consists of a switching mechanism, a selector mechanism, a drive system, and a control device. It has the characteristics of high operational reliability, easy maintenance, and suitability for large capacity power transformers. It is widely used in transmission substations, power grid voltage regulation, and large-scale industrial power supply systems. In 2025, global External On-load Tap Changer production reached approximately 13,824 Units, with an average global market price of around US\$ 23,689 per unit.

The annual production capacity of external on-load tap changer is 20,000 units, with a gross profit margin of about 35%.

**Upstream:** The upstream of external on-load tap changer mainly includes suppliers of electrical materials and key components, such as electrical contact materials (copper alloy, silver alloy), insulation materials (epoxy resin, insulation cardboard), steel and structural components, drive motors, control system components, and transformer oil.

**Downstream:** The main customers are power transformer manufacturers, power grid companies, and large industrial users, with application areas including transmission substations, power grid voltage regulation, ultra-high voltage engineering, new energy

grid connection, and large-scale industrial power supply systems. Among them, power grid investment and power infrastructure construction are important driving forces for demand growth.

Raw material costs account for approximately 45% to 55%, while manufacturing and processing costs account for approximately 15% to 20%,

R&D and testing costs account for approximately 8% to 12%, while quality and certification costs account for approximately 5% to 8%,

Sales and service costs: approximately 5% to 8%.
