The global Extracorporeal Shock Wave Lithotripter market size is predicted to grow from US\$ 411 million in 2025 to US\$ 586 million in 2032; it is expected to grow at a CAGR of 5.3% from 2026 to 2032.

Extracorporeal shock wave lithotripsy (ESWL) is a non-invasive treatment for kidney and gallstones. Its main principle is to use extracorporeal shock waves to break up the kidney stones. Stones between 4 mm (0.16 inches) and 2 cm (0.8 inches) in diameter are most commonly treated with ESWL, with a shock frequency of 60-90 times per minute for optimal stone fragmentation. The ESWL machine is a core piece of equipment for non-invasive stone treatment, primarily classified based on the energy source and positioning method, and its application is mainly concentrated in urology. The average price of this product is approximately \$90,000, with approximately 4,669 units sold worldwide.

The upstream of the extracorporeal shock wave lithotripsy (ESWL) industry chain mainly includes high-energy shock wave generators (electrohydraulic, electromagnetic, piezoelectric), image positioning systems (X-ray/ultrasound), and medical-grade materials and components, such as high-voltage power supplies, focusing lenses, and ultrasound probes. These determine the accuracy and reliability of the equipment. Downstream applications include general hospitals, urology hospitals, outpatient lithotripsy centers, and some extended applications in bile duct stones and rehabilitation medicine (musculoskeletal shock wave therapy). Future development trends focus on dual-mode positioning (X-ray + ultrasound), low-energy multiple shocks to reduce tissue damage, and intelligent lithotripsy monitoring systems. Simultaneously, with the rising incidence of stones, an aging population, and increased demand for non-invasive treatments, the market will maintain stable growth. The construction of commercial

aerospace medical and regional lithotripsy centers will also drive the miniaturization and mobility of equipment, making it more suitable for primary healthcare institutions.
