Extractables and leachables testing solutions are a set of analytical techniques and services used to assess and quantify the potential release of chemical compounds from materials, containers, and packaging into products or pharmaceuticals. These compounds, known as extractables and leachables, can have safety and quality implications for a wide range of industries, including pharmaceuticals, food and beverages, cosmetics, and medical devices.

E&L testing is benefiting from advancements in analytical instrumentation, including high-resolution mass spectrometry (HRMS), nuclear magnetic resonance (NMR) spectroscopy, and liquid chromatography-tandem mass spectrometry (LC-MS/MS). These techniques enable more precise identification and quantification of extractables and leachables at lower detection limits.
