The report requires updating with new data and is sent in 48 hours after order is placed.

According to our LPI (LP Information) latest study, the global Eye Care Surgical market size was valued at US$ 13430 million in 2023. With growing demand in downstream market, the Eye Care Surgical is forecast to a readjusted size of US$ 19310 million by 2030 with a CAGR of 5.3% during review period.

The research report highlights the growth potential of the global Eye Care Surgical market. Eye Care Surgical are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Eye Care Surgical. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Eye Care Surgical market.

Eye surgery, also known as ocular surgery, is surgery performed on the eye or its adnexa, typically by an ophthalmologist. The eye is a very fragile organ, and requires extreme care before, during, and after a surgical procedure to minimise or prevent further damage. An expert eye surgeon is responsible for selecting the appropriate surgical procedure for the patient, and for taking the necessary safety precautions.

Cataract surgeries dominated the eye care surgical market. The primary reason for this segment’s growth is the increased adoption of different ophthalmology treatment methodologies by the aging population. Factors such as the increasing incidences of cataract and growing use of IOLs will result in this segment’s growth over the next few years.
