Abstracts

The global Eye Massager with Steam & Heat market size is predicted to grow from US\$ 616 million in 2025 to US\$ 856 million in 2032; it is expected to grow at a CAGR of 4.8% from 2026 to 2032.

Eye Massager with Steam & Heat refers to reusable electronic eye-care equipment that integrates active steam or atomized moist-heat generation with mechanical eye-area massage in a wearable eye-mask form. The product uses ultrasonic atomization or thermal evaporation to deliver warm moisture around the eye area and combines vibration, contact-point massage, air compression or hybrid massage mechanisms to provide relaxation and moist-heat care. The confirmed product structure covers low-temperature heating below 40°C, a moderate-temperature range of 40–42°C and higher-temperature settings above 42°C, with premium configurations increasingly incorporating adjustable mist output, multi-level temperature control, cold-and-hot treatment, independent temple massage, removable water tanks, sanitation functions, Bluetooth audio and preset operating modes. Eye Massager with Steam & Heat is primarily used for digital eye-strain relief associated with prolonged office work, study and screen use, moist-heat comfort for eye dryness, home relaxation before sleep, and eye-area beauty and puffiness care.

Key Findings

Ultrasonic atomization is increasingly prominent in new-generation Eye Massager with Steam & Heat products

The 40–42°C range forms a common core comfort zone while premium models extend to adjustable multi-temperature operation

Product value is increasingly differentiated by compound massage steam control sanitation functions and intelligent operating modes

PGG launched its E7 steam eye massager in 2025 as suppliers accelerated integration of atomization heat and multi-point massage

Market Trends

The Eye Massager with Steam & Heat market is evolving from relatively simple warm-steam eye masks toward multifunctional personal eye-care systems integrating precise atomization, controlled heating and increasingly complex massage mechanisms. Ultrasonic micron-level atomization has become particularly visible in newer products because it enables rapid mist generation and more controllable moisture delivery without relying solely on traditional thermal evaporation. Philips' PPM5204EDG combines ultra-fine steam atomization with 14 eye-area vibration contacts, bilateral temple air-compression massage, hot-and-cold treatment, a removable water tank and ultraviolet sanitation, while PGG's E7 integrates micron-level steam mist with three mist-output settings and temperature settings at 38°C, 42°C and 45°C. The broader development direction is toward simultaneous rather than sequential treatment: steam, warming and massage increasingly operate within one programmed session. Suppliers are also expanding functionality through Bluetooth audio, white noise, voice prompts and multiple scenario-based modes. As a result, product differentiation is shifting from whether a device provides heat toward how precisely it controls moisture and temperature, how completely it covers the eye and temple areas, and how effectively multiple functions are integrated into a compact wearable format.

Market Dynamics

Drivers

Demand for Eye Massager with Steam & Heat is supported by the expansion of screen-intensive work, study and entertainment habits and by growing consumer interest in convenient home-based eye relaxation. Compared with dry-heated eye massagers, active steam or atomized moist-heat systems provide an additional moisture-delivery function that suppliers increasingly position for users experiencing eye dryness and fatigue after extended screen exposure. PANGO's Smart Steam Atomized Eye Massager, for example, combines steam massage, heating and 12 massage heads, while Ublives positions MistEyes Relax 2 around steam-based relaxation and hydration

of the eye area. The category also benefits from increasing acceptance of multifunctional personal wellness electronics. By combining moist heat, physical massage, temperature control and entertainment or relaxation functions in a single wearable device, suppliers can address several consumer use occasions—including office recovery, evening relaxation and pre-sleep care—within one product platform.

Restraints

The category remains constrained by its narrower technical definition and by higher system complexity compared with conventional heated eye massagers. Integrating water storage, mist generation, temperature control and massage mechanisms increases component count, internal packaging complexity, sealing requirements and cleaning requirements. Products containing reusable water tanks must also manage hygiene, residual moisture and long-term reliability, which has encouraged higher-value models to add detachable reservoirs or sanitation functions. Philips integrates a removable water tank and ultraviolet sanitation, while PGG's E7 uses a detachable sterilization water-tank design, illustrating the additional engineering required around the moist-heat system. Consumer comfort creates another constraint because heat, steam output and massage pressure must remain acceptable around a sensitive anatomical area. Product developers therefore need to balance sufficient moisture and warming performance against weight, noise, pressure distribution and temperature stability. These requirements raise development costs and make the category less suitable for very low-cost product positioning.

Opportunities

The most attractive opportunity lies in upgrading Eye Massager with Steam & Heat from a basic relaxation accessory into a more differentiated personal eye-care platform. Adjustable atomization volume and temperature provide opportunities to personalize product settings for different seasons and user preferences, while hot-and-cold operation can broaden usage occasions beyond conventional warm compress. Composite massage also creates value potential: eye-area contact points can be combined with independent temple air bags or massage heads to increase coverage without substantially enlarging the wearable device. Philips already combines eye-area vibration with temple air compression, while PGG uses dedicated eye-area massage heads and adaptive temple air bags. Additional opportunities exist in hygiene-oriented water-tank design, quieter operation, lighter structures, longer battery life and foldable or travel-friendly formats. Suppliers can also develop more clearly differentiated product tiers by combining basic steam and vibration in entry configurations and adding multi-

temperature control, compound massage, sanitation, Bluetooth audio and intelligent modes in higher-value products.

Challenges

A major challenge is establishing clear product differentiation from adjacent categories. The broader eye-massager market contains many devices offering dry heating, vibration or air compression without active steam, while disposable steam eye masks provide moist heat without reusable electronic massage. Eye Massager with Steam & Heat therefore occupies a narrower intersection of the two categories, which limits the number of directly comparable suppliers and can create inconsistent product naming across markets. Another challenge is achieving repeatable moist-heat performance in a lightweight wearable structure. Water tanks, atomizers, heating components, batteries and massage mechanisms must operate safely and reliably while remaining compact enough for comfortable facial use. Product cleaning and maintenance are also more important than for dry devices. Suppliers must additionally manage the consumer-health boundary carefully: products are widely positioned around relaxation, eye fatigue and comfort, but manufacturers need disciplined claims management where products are sold as consumer wellness devices rather than regulated medical treatment systems.

Industry Chain Analysis

The upstream industry chain for Eye Massager with Steam & Heat includes ultrasonic atomizers or steam-generation modules, miniature water reservoirs, heating elements, NTC temperature sensors, vibration motors, air pumps and air bags, silicone massage contacts, control ICs, rechargeable lithium batteries, Bluetooth modules, speakers, ultraviolet sanitation modules in selected products, plastic housings, straps and skin-contact materials. Compared with ordinary dry-heat eye massagers, the addition of active steam or mist introduces a dedicated fluid-management subsystem consisting of water storage, atomization, channels, sealing structures and related temperature and hygiene controls. Product cost therefore depends not only on the massage mechanism but also on atomization stability, heating precision, water-system durability and the level of integrated electronic control.

The midstream covers industrial design, electronic and mechanical integration, mold development, assembly, firmware, operating-mode design, quality control and brand operation. Value creation increasingly comes from combining several functions into a compact and comfortable form rather than from any single component. PGG integrates micron-level mist generation, adjustable temperature, massage and water-tank

sanitation in its E7 platform, while Philips combines steam atomization, vibration contacts, air-compression massage, hot-and-cold treatment and multimedia functions in one device. Downstream sales primarily target individual consumers through branded e-commerce, consumer-electronics channels and personal wellness distribution. Brand positioning, industrial design, comfort, safety perception, online reviews and after-sales service therefore play a relatively important role in the final value chain.

Segment Insights

By moist-heat generation technology, ultrasonic atomization is becoming an important product-development direction in Eye Massager with Steam & Heat because it supports rapid mist production, compact construction and relatively flexible control of mist output. PGG identifies ultrasonic micron atomization as one of its core technologies, and its E7 produces micron-level steam mist with three adjustable mist levels. Philips likewise uses ultra-fine steam atomization and promotes rapid mist generation, while PANGO commercializes dedicated Smart Steam Atomized Eye Massager products. Thermal evaporation remains relevant in established steam-eye-care designs, particularly where the product emphasis is on continuous warm steam rather than complex mist regulation. Panasonic's EH-SW68, for example, is specified with a rechargeable steam system and "ample steam" functionality.

By heating temperature, the 40–42°C moderate-temperature range represents an important operating zone across confirmed commercial products, while differentiated models extend below or above this range through adjustable temperature settings. PGG's E7 provides 38°C, 42°C and 45°C settings, showing how multi-temperature control can create higher functional value. By massage mechanism, vibration and contact-point systems provide a relatively compact architecture, air-compression systems emphasize broad pressure around the temples or surrounding areas, and hybrid configurations combine both approaches to increase coverage and perceived massage complexity. Premium products increasingly use this functional integration to support higher value positioning rather than relying solely on stronger heat or steam output.

Downstream Market Opportunities

Digital eye-strain relief represents a broad consumer use case for Eye Massager with Steam & Heat because office workers, students and frequent screen users increasingly seek convenient short-duration relaxation products that can be used at home or during breaks. Dry-eye comfort is a more technically differentiated opportunity because active

mist or steam provides a moist-heat experience that ordinary electrically heated eye masks cannot replicate. Suppliers also target evening relaxation and sleep preparation by combining warm steam with massage, music, white noise or silent modes, extending the category into the broader personal wellness market. Eye-area beauty and puffiness care provide another opportunity for products equipped with hot-and-cold treatment or adjustable thermal modes. Philips already offers five operating modes covering moist-eye care, beauty, general eye care, eye exercise and sleep scenarios, illustrating the potential for one hardware platform to address multiple consumer occasions. Future downstream expansion will depend on making these usage scenarios more distinct while avoiding excessive overlap with dry-heat massagers and disposable steam masks.

Regional Insights

China is a particularly important manufacturing and product-development center for Eye Massager with Steam & Heat. The confirmed supplier landscape includes PGG, ??, Shenzhen Pango Medical Electronics and other Chinese manufacturers or brand operators offering atomized steam and integrated massage products. PGG has developed dedicated steam-eye-massager technology and launched the E7 platform in 2025, while ?? currently positions its Y7PRO around steam atomization, massage and heat. PANGO's product portfolio includes steam-heated and atomized eye massagers for customized supply. The dense manufacturing base supports rapid product iteration around atomization, massage structures and electronics integration.

Japan represents an established market for steam-based personal eye care through Panasonic's Eye Esth? product concept, while European and North American brands participate through newer multifunctional systems and consumer-wellness channels. Philips has introduced a highly integrated steam eye massager in China combining cold and hot steam with multi-point and air-compression massage, while Ublives markets a dedicated steam eye massager to U.S.-oriented consumers. Regional competition is therefore not uniform: East Asian suppliers currently show greater product density and manufacturing depth, while international brands can differentiate through design, consumer trust, channel reach and higher-value integrated functionality.

Competitive Landscape Analysis

The Eye Massager with Steam & Heat market is a relatively narrow and fragmented subcategory within the broader eye-massager industry, with fewer confirmed suppliers than the conventional dry-heated eye-massager segment. The verified competitive set

includes Shenzhen DATOUREN Industrial Co., LTD under the PGG brand, Koninklijke Philips N.V., ??, Panasonic Corporation, Shenzhen Pango Medical Electronics Co., Ltd., Ublives and Shenzhen Honghe Business Co., Ltd. Competition is increasingly based on the degree of steam and massage integration rather than brand scale alone. PGG has developed a dedicated steam-eye-massager product line and launched E7 in 2025 with Circu mist convergence technology, micron-level atomization, adjustable steam output, multi-temperature control and compound eye-and-temple massage. Philips differentiates through a highly integrated PPM5204EDG configuration combining cold and hot steam, 14 vibration contacts, bilateral temple air-compression massage, ultraviolet water-tank sanitation and multiple operating modes. ?? has expanded its eye-massager portfolio around steam-atomization technology, while Panasonic retains a differentiated position through its established steam-based Eye Esth? platform. PANGO participates more strongly from the manufacturing and customized-product side, offering multiple steam-heated and atomized eye-massager architectures. Given the small number of brands with clearly verified integrated steam-and-massage systems, competitive advantage is likely to depend on atomization stability, temperature control, comfort, massage coverage, water-system hygiene, product weight, battery performance, industrial design and the ability to build consumer awareness around a relatively specialized eye-care format.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the "Eye Massager with Steam & Heat Industry Forecast" looks at past sales and reviews total world Eye Massager with Steam & Heat sales in 2025, providing a comprehensive analysis by region and market sector of projected Eye Massager with Steam & Heat sales for 2026 through 2032. With Eye Massager with Steam & Heat sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world Eye Massager with Steam & Heat industry.

This Insight Report provides a comprehensive analysis of the global Eye Massager with Steam & Heat landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Eye Massager with Steam & Heat portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Eye Massager with Steam & Heat market.

This Insight Report evaluates the key market trends, drivers, and affecting factors

shaping the global outlook for Eye Massager with Steam & Heat and breaks down the forecast by Type, by End User, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Eye Massager with Steam & Heat.

This report presents a comprehensive overview, market shares, and growth opportunities of Eye Massager with Steam & Heat market by product type, application, key manufacturers and key regions and countries.

Market Segmentation

Segmentation by Type:

Ultrasonic Atomization Steam Eye Massagers

Thermal Evaporation Steam Eye Massagers

Others

Segmentation by Heating Temperature Types:

Low-Temperature Heat (<40°C)

Moderate-Temperature Heat (40–42°C)

High-Temperature Heat (>42°C)

Segmentation by Massage Mechanism Types:

Vibration and Contact-Point Massage

Air-Compression Massage

Combined Contact-Point and Air-Compression Massage

Others

Segmentation by End User:

Elderly Users

Office Workers

Students

Others

This report also splits the market by region:

Americas

United States

Canada

Mexico

Brazil

APAC

China

Japan

Korea

Southeast Asia

India

Australia

Europe

Germany

France

UK

Italy

Russia

Middle East & Africa

Egypt

South Africa

Israel

Turkey

GCC Countries

The below companies that are profiled have been selected based on inputs gathered from primary experts and analysing the company's coverage, product portfolio, its market penetration.

Philips

RENPHO

Panasonic

BLEPHASTEAM

Manta Sleep

Ublives

Beminda

PGG

Miaojie

Xiaomi

Shenzhen Pangao Medical Electronics Co

Key Questions Addressed in this Report

What is the 10-year outlook for the global Eye Massager with Steam & Heat market?

What factors are driving Eye Massager with Steam & Heat market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Eye Massager with Steam & Heat market opportunities vary by end market size?

How does Eye Massager with Steam & Heat break out by Type, by End User?

Contents

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview

- 2.1.1 Global Eye Massager with Steam & Heat Annual Sales 2021-2032
- 2.1.2 World Current & Future Analysis for Eye Massager with Steam & Heat by Geographic Region, 2021, 2025 & 2032
- 2.1.3 World Current & Future Analysis for Eye Massager with Steam & Heat by Country/Region, 2021, 2025 & 2032
- 2.2 Eye Massager with Steam & Heat Segment by Type
 - 2.2.1 Ultrasonic Atomization Steam Eye Massagers
 - 2.2.2 Thermal Evaporation Steam Eye Massagers
 - 2.2.3 Others
 - 2.2.4 Eye Massager with Steam & Heat Sales by Type
 - 2.2.4.1 Global Eye Massager with Steam & Heat Sales Market Share by Type (2021-2026)
 - 2.2.4.2 Global Eye Massager with Steam & Heat Revenue and Market Share by Type (2021-2026)
 - 2.2.4.3 Global Eye Massager with Steam & Heat Sale Price by Type (2021-2026)
- 2.3 Eye Massager with Steam & Heat Segment by Heating Temperature Types
 - 2.3.1 Low-Temperature Heat (<40°C)
 - 2.3.2 Moderate-Temperature Heat (40–42°C)
 - 2.3.3 High-Temperature Heat (>42°C)
 - 2.3.4 Eye Massager with Steam & Heat Sales by Heating Temperature Types
 - 2.3.4.1 Global Eye Massager with Steam & Heat Sales Market Share by Heating Temperature Types (2021-2026)
 - 2.3.4.2 Global Eye Massager with Steam & Heat Revenue and Market Share by

Heating Temperature Types (2021-2026)

2.3.4.3 Global Eye Massager with Steam & Heat Sale Price by Heating Temperature Types (2021-2026)

2.4 Eye Massager with Steam & Heat Segment by Massage Mechanism Types

2.4.1 Vibration and Contact-Point Massage

2.4.2 Air-Compression Massage

2.4.3 Combined Contact-Point and Air-Compression Massage

2.4.4 Others

2.4.5 Eye Massager with Steam & Heat Sales by Massage Mechanism Types

2.4.5.1 Global Eye Massager with Steam & Heat Sales Market Share by Massage Mechanism Types (2021-2026)

2.4.5.2 Global Eye Massager with Steam & Heat Revenue and Market Share by Massage Mechanism Types (2021-2026)

2.4.5.3 Global Eye Massager with Steam & Heat Sale Price by Massage Mechanism Types (2021-2026)

2.5 Eye Massager with Steam & Heat Segment by End User

2.5.1 Elderly Users

2.5.2 Office Workers

2.5.3 Students

2.5.4 Others

2.5.5 Eye Massager with Steam & Heat Sales by End User

2.5.5.1 Global Eye Massager with Steam & Heat Sale Market Share by End User (2021-2026)

2.5.5.2 Global Eye Massager with Steam & Heat Revenue and Market Share by End User (2021-2026)

2.5.5.3 Global Eye Massager with Steam & Heat Sale Price by End User (2021-2026)

3 GLOBAL BY COMPANY

3.1 Global Eye Massager with Steam & Heat Breakdown Data by Company

3.1.1 Global Eye Massager with Steam & Heat Annual Sales by Company (2021-2026)

3.1.2 Global Eye Massager with Steam & Heat Sales Market Share by Company (2021-2026)

3.2 Global Eye Massager with Steam & Heat Annual Revenue by Company (2021-2026)

3.2.1 Global Eye Massager with Steam & Heat Revenue by Company (2021-2026)

3.2.2 Global Eye Massager with Steam & Heat Revenue Market Share by Company (2021-2026)

3.3 Global Eye Massager with Steam & Heat Sale Price by Company

3.4 Key Manufacturers Eye Massager with Steam & Heat Producing Area Distribution, Sales Area, Product Type

3.4.1 Key Manufacturers Eye Massager with Steam & Heat Product Location Distribution

3.4.2 Players Eye Massager with Steam & Heat Products Offered

3.5 Market Concentration Rate Analysis

3.5.1 Competition Landscape Analysis

3.5.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)

3.6 New Products and Potential Entrants

3.7 Market M&A Activity & Strategy

4 WORLD HISTORIC REVIEW FOR EYE MASSAGER WITH STEAM & HEAT BY GEOGRAPHIC REGION

4.1 World Historic Eye Massager with Steam & Heat Market Size by Geographic Region (2021-2026)

4.1.1 Global Eye Massager with Steam & Heat Annual Sales by Geographic Region (2021-2026)

4.1.2 Global Eye Massager with Steam & Heat Annual Revenue by Geographic Region (2021-2026)

4.2 World Historic Eye Massager with Steam & Heat Market Size by Country/Region (2021-2026)

4.2.1 Global Eye Massager with Steam & Heat Annual Sales by Country/Region (2021-2026)

4.2.2 Global Eye Massager with Steam & Heat Annual Revenue by Country/Region (2021-2026)

4.3 Americas Eye Massager with Steam & Heat Sales Growth

4.4 APAC Eye Massager with Steam & Heat Sales Growth

4.5 Europe Eye Massager with Steam & Heat Sales Growth

4.6 Middle East & Africa Eye Massager with Steam & Heat Sales Growth

5 AMERICAS

5.1 Americas Eye Massager with Steam & Heat Sales by Country

5.1.1 Americas Eye Massager with Steam & Heat Sales by Country (2021-2026)

5.1.2 Americas Eye Massager with Steam & Heat Revenue by Country (2021-2026)

5.2 Americas Eye Massager with Steam & Heat Sales by Type (2021-2026)

5.3 Americas Eye Massager with Steam & Heat Sales by End User (2021-2026)

5.4 United States

5.5 Canada

5.6 Mexico

5.7 Brazil
