Abstracts

The global Eyebrow Color market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Eyebrows are a major facial feature. Cosmetic methods have been developed to alter the look of one's eyebrows, whether the goal is to add or remove hair, change the color, or change the position of the eyebrow.

Eyebrow brushes, shaders, and pencils are often used to define the eyebrow or make it appear fuller. These can create an outline for the brows or mimic hairs where there are sparse areas. Brow gels are also used in creating a thicker brow; they allow for the hairs to be more textured, which gives the appearance of thicker, fuller brows. Lastly, brow powders or even eyeshadows are used for those who want a fuller and more natural look, by placing the brow powder or eyeshadow (closest to the natural hair colour) in areas where there is less hair.

A fairly recent trend in eyebrow modification is in eyebrow tinting: permanent dye, similar to hair colour, is used on the eyebrows, often to darken them.

The total size of the global beauty industry in 2022 was about US\$ 427 billion, with the sales of skin care products was about US\$ 190 billion, perfumes US\$ 70 billion, color cosmetics US\$ 80 billion, hair care products US\$ 90 billion. Head beauty and personal care companies are concentrated in Europe and the United States. More than one-third of the top 100 companies are headquartered in the United States, and 22.9% of the companies are located in France.
