The facial deep cleansing instrument is a beauty instrument specially used for deep cleansing of facial skin. Using sonic vibration or ultrasonic technology, it penetrates deep into the skin pores to remove dirt, oil and dead skin cells, helping to improve skin texture and increase skin radiance and refinement. Future facial deep cleansing instruments will be more and more multifunctional. In addition to deep cleansing, other functions may be added, such as introducing nutrients, massaging the skin, firming and lifting, etc., making it an all-round beauty instrument.
