The report requires updating with new data and is sent in 48 hours after order is placed.

The global Fantasy Game App market size is projected to grow from US\$ 29300 million in 2022 to US\$ 67340 million in 2029; it is expected to grow at a CAGR of 12.6% from 2023 to 2029.

Growing digital infrastructure, increasing availability of affordable smartphones, and rising availability of high-speed internet fuel the market. Rising trend of integrating Artificial Intelligence (AI) and Virtual Reality (VR) technologies in fantasy games boosts the market.

A fantasy game refers to a type of video game, which is often played using the internet, and where a player can control the actions of a character in an immersive and well-defined virtual world or assemble virtual teams to play a game. Players need to download applications for any particular game that they wish to play. These applications are available on several gaming platforms such as Google Play Store and Apple App Store. Once downloaded to a desired smart device, players can follow the gaming instructions to commence the game. A game character or characters need to be defined by players to start the game. The game can be in a story format where a new virtual world is created in the game, or it can be a simple game or sport to be played among players. Players get points as they complete tasks or win games. These points are further used to add components to the game to enhance the experience of the game. Players can purchase the game components as well.
