Abstracts

The global Farmed Tuna market size is predicted to grow from US$ 1565 million in 2025 to US$ 2226 million in 2032; it is expected to grow at a CAGR of 5.2% from 2026 to 2032.

Farmed Tuna refers to the cultivation of various tuna species, including Bluefin (the most valuable), Yellowfin, and Albacore, within controlled marine sea cages. Due to their biology as high-speed, migratory apex predators, tuna cannot be raised in traditional land-based ponds; instead, they require massive offshore pens with high oxygen levels and strong currents. The industry predominantly utilizes "tuna ranching," where wild-caught juveniles are transferred to cages and fattened on a specialized high-lipid diet. More recently, "full-cycle aquaculture" (closed-loop) has reached commercial viability, particularly in Japan, allowing for production from eggs without depleting wild stocks. The primary commercial advantage of farmed tuna is the ability to control fat content (marbling), ensuring a year-round, consistent supply of premium sashimi-grade meat.

In 2025, global Farmed Tuna production was 80000 MT, and average price was 20,000USD/MT, gross margin 30%.

United States market for Farmed Tuna is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Farmed Tuna is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Farmed Tuna is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the “Farmed Tuna Industry Forecast” looks at past sales and reviews total world Farmed Tuna sales in 2025, providing a comprehensive analysis by region and market sector of projected Farmed Tuna sales for 2026 through 2032. With Farmed Tuna sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world Farmed Tuna industry.

This Insight Report provides a comprehensive analysis of the global Farmed Tuna landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Farmed Tuna portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms’ unique position in an accelerating global Farmed Tuna market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Farmed Tuna and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Farmed Tuna.

This report presents a comprehensive overview, market shares, and growth opportunities of Farmed Tuna market by product type, application, key manufacturers and key regions and countries.
