According to our LPI (LP Information) latest study, the global Fasteners market size was valued at US\$ million in 2023. With growing demand in downstream market, the Fasteners is forecast to a readjusted size of US\$ million by 2030 with a CAGR of % during review period.

The research report highlights the growth potential of the global Fasteners market. Fasteners are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Fasteners. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Fasteners market.

A fastener is a hardware device that mechanically joins or affixes two or more objects together. In general, fasteners are used to create non-permanent joints; that is, joints that can be removed or dismantled without damaging the joining components. Welding is an example of creating permanent joints.

Fasteners can also be used to close a container such as a bag, a box, or an envelope; or they may involve keeping together the sides of an opening of flexible material, attaching a lid to a container, etc. There are also special-purpose closing devices, e.g. a bread clip.

Some types of woodworking joints make use of separate internal reinforcements, such as dowels or biscuits, which in a sense can be considered fasteners within the scope of the joint system, although on their own they are not general purpose fasteners.

In the Chinese market, the main fastener manufacturers include Shanghai Jiyou, GEM-YEAR, BOLTUN, Changshu City Standard Part, Xingyi Fasteners, Jiaxing Brothers Standard Parts, Weifeng, Zhejiang Zhapu, Shanghai Jianxin Metal Products and Dongwei Enterprise.
