The report requires updating with new data and is sent in 48 hours after order is placed.

The fat suction device is based on the negative pressure liposuction weight loss surgery in the traditional sense, and a mechanical reciprocating device is added. Let the liposuction tube reciprocate at a distance of 2-5mm at 3000-10000 times/min, which not only expands the scope and effect of liposuction, but also reduces the physical exertion of the doctor during the operation.
