Fatty acid methyl ester ethoxylate (FMEE) is a non-ionic surfactant with low foam, which is prepared by adding fatty acid methyl ester directly with ethylene oxide (EO) under the action of corresponding catalyst. Under low temperature conditions (below 60 °C), it has excellent cleaning performance, especially outstanding dispersibility, which can effectively prevent the anti fouling of dirt during the cleaning process. Its permeability, emulsification and other properties are better than the AEO series, making it a substitute for APEO surfactants such as TX and OP.
