The global FBT Type Optical Splitter market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

FBT type optical splitter (Fused Biconic Taper splitter) is an optical splitter manufactured using fused bi-taper gradient technology. During the manufacturing process, two or more optical fibers are fused together by heating and stretching, and then gradually stretched to form a bi-tapered gradient structure, ultimately forming an optical splitter. The FBT type optical splitter has the advantages of simple manufacturing process and low cost, but it is not as good as the PLC type optical splitter in terms of loss and uniformity. FBT type optical splitters are usually used in lower-cost, low-demand optical fiber communication systems.

United States market for FBT Type Optical Splitter is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
