The global Feather and Down Products market size is predicted to grow from US$ 9884 million in 2025 to US$ 12170 million in 2031; it is expected to grow at a CAGR of 3.5% from 2025 to 2031.

The down of birds is a layer of fine feathers found under the tougher exterior feathers. Very young altricial birds are clad only in down. Powder down is a specialized type of down found only in a few groups of birds. Down is a fine thermal insulator and padding, used in goods such as jackets, bedding (duvets), pillows and sleeping bags. The discovery of feathers trapped in ancient amber suggests that some species of dinosaur may have possessed down-like feathers.

The market is fragmented. Top 10 manufacturers only took 35.68% market share in 2019.
