## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Feed grade L-lysine liquid is an important feed additive, it belongs to amino acid nutritional supplements. L-lysine is an amino acid that cannot be synthesized by the animal body itself, but must be absorbed directly from the feed supplement, it is the most important of the eight essential amino acids in the animal body, so it is also known as the 'limiting amino acid'. Feed grade L-lysine liquid is commonly used in feeds to increase the amino acid content of feeds and improve the growth rate and feed conversion rate of animals. In addition, it can improve protein utilization and promote muscle growth.
