The global Female Fertility and Pregnancy Rapid Test market size is predicted to grow from US\$ 404 million in 2025 to US\$ 503 million in 2031; it is expected to grow at a CAGR of 3.7% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

The retail stores include drugstores, supermarkets, and hypermarkets. The demand for female fertility and pregnancy rapid tests is high due to the wide presence of retail stores. In developing countries such as India, especially the rural areas, people prefer retail stores to purchase medical products such as pregnancy test kit and female fertility kits because they have limited feasibility to purchase products online. This in turn, will have a positive impact on the female fertility and pregnancy rapid test market in terms of growth in the retail stores segment.
