Common grip styles include the French grip, pistol grip, and orthopedic grip, each offering distinct ergonomic features. The choice of grip can significantly impact a fencer's control, maneuverability, and overall performance. Grips are typically made of materials like rubber, leather, or plastic, designed to provide a tactile and non-slip surface for the fencer's hand. Fencers often select grips based on personal comfort, the specific weapon they use (foil, ?p?e, or saber), and the fencing techniques they employ.
