Ferrous scrap shredder is a special equipment that uses mechanical force to compress and crush scrap iron. It usually includes a powerful crushing device and an efficient separation system, which can crush scrap iron blocks into small particles for easy transportation and recycling. The equipment crushes the scrap iron through a rotating hammer or pressure roller according to the physical characteristics and crushing requirements of the scrap iron. It also has a screening function to separate impurities and unbreakable objects. Its advantages are to increase the recovery rate of scrap iron, reduce transportation costs, reduce environmental pollution, and enhance the utilization value of scrap iron, which helps to achieve sustainable recycling and utilization of resources.
