A fiber media converter, also known as fiber transceiver or Ethernet media converter is a networking device that allows connecting two different media types, such as a twisted pair or coaxial cable to a fiber-optic cable. This type of device is very important as it allows interconnecting fiber-optic networks and cable systems with pre-existing copper-based cabling systems. This allows for partial upgrades of network infrastructure into fiber-optic technology and for interconnection with other types of communication networks.

Global Fiber Media Converters key players include TP-Link, Phoenix Contact, Belden, Moxa, Advantech, etc. Global top five manufacturers hold a share over 8%.

Asia Pacific is the largest market, with a share about 40%, followed by North America

Europe, both have a share about 40 percent. In terms of product, Gigabit Type is the largest segment, with a share over 40%. And in terms of application, the largest application is Factory Automation, followed by IP Security.
