The global Field Programmable Gate Array Board market size is predicted to grow from US$ million in 2025 to US$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

An FPGA board (FPGA evaluation board or FPGA development board) is a board with an FPGA (Field Programmable Gate Array) and peripheral components that is used in the initial stage of FPGA development or for learning FPGA development.

FPGAs are usually mounted on dedicated boards according to product specifications, but since these dedicated boards take time to develop, FPGA boards are generally used to evaluate FPGAs in the early stages of product development. For this reason, FPGA boards usually come pre-installed with various interfaces necessary for FPGA development.
