## Abstracts

The global Fire Alarm Detector market size is predicted to grow from US\$ 2281 million in 2025 to US\$ 3114 million in 2032; it is expected to grow at a CAGR of 4.6% from 2026 to 2032.

A fire alarm detector is a safety device used to detect and alert people to the presence of a fire. It is designed to sense specific indicators of fire, such as smoke, heat, or other related parameters, and trigger an alarm when necessary to notify individuals to take appropriate measures. Fire alarm detectors can be used independently or integrated into a fire alarm system. When integrated, they can be connected to other detectors and a control panel, enabling multi-point monitoring and centralized management. In the event of a fire, the alarm detector will trigger the alarm and activate emergency response measures such as automatically dialing emergency numbers, activating sprinkler systems, or notifying relevant personnel. In 2025, global Fire Alarm Detector production reached approximately 41.63 M Units, with an average global market price of around US\$ 56 per unit.

The fire alarm detector market is a typical rigid demand market with a large overall scale and stable growth, mainly driven by building safety regulations, urbanization process, and infrastructure construction. With the continuous improvement of fire safety standards in various countries, the popularity of detectors in residential and commercial buildings continues to increase. From the perspective of development trends, the industry is upgrading from traditional single detection to multi-sensor fusion and intelligence, in order to reduce false alarm rates and improve response efficiency. At the same time, the application of IoT technology is driving the development of devices towards networking and remote monitoring. In terms of competitive landscape, international firefighting companies have an advantage in high-end systems and certification, while local manufacturers have cost and channel advantages in the mid to low end market. Overall, the market exhibits the characteristics of 'strong policy driven,

stable demand, and obvious intelligent upgrading'.
