Fire-rated vault doors are specialized doors designed for high-security facilities, combining fire-resistant properties with protective functions. They provide thermal and smoke barriers for a specified duration during a fire while also resisting unauthorized entry or explosive impacts. These doors are typically made from high-strength steel, non-combustible materials, and multi-layer insulation, meeting specific fire safety ratings (e.g., UL, NFPA standards). They are widely used in bank vaults, archives, data centers, and other locations requiring advanced security and fire protection.

United States market for Fire Rated Vault Doors is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
