The global Firefighting eVTOL market size is predicted to grow from US$ million in 2025 to US$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

The firefighting eVTOL is an electric vertical take-off and landing aircraft, mainly used for firefighting and rescue missions in high-rise buildings and complex environments. During operation, it can achieve rapid deployment and precise positioning through remote control or automatic driving systems, and release fire extinguishing agents for firefighting or rescue operations. Its advantage is that it can respond to fires quickly, is not restricted by ground obstacles, and effectively improves rescue efficiency and safety. In addition, the firefighting eVTOL has the characteristics of low noise and zero emissions, which is suitable for densely populated urban areas and reduces the impact on the environment.

United States market for Firefighting eVTOL is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Firefighting eVTOL is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Firefighting eVTOL is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
