Abstracts

The global Fishing Tournament Software market size is predicted to grow from US$ 84.81 million in 2025 to US$ 176 million in 2032; it is expected to grow at a CAGR of 10.8% from 2026 to 2032.

Fishing Tournament Software refers to a specialized digital platform used to organize, manage, score, and publish results for fishing competitions. It typically supports online registration, angler/team profiles, entry fee payment, tournament rule configuration, check-in, catch submission, photo or video verification, weigh-in recording, length/weight scoring, real-time leaderboards, judge review, season points, prize calculation, and final results reporting. The software can be used for bass tournaments, saltwater tournaments, kayak fishing, online fishing events, catch-photo-release formats, catch-weigh-release formats, and traditional weigh-in competitions.

Demand for Fishing Tournament Software is growing as fishing clubs, tournament directors, brands, marinas, outdoor retailers, and fishing associations shift from manual registration, paper score sheets, and offline weigh-ins to digital event management and real-time scoring. Key demand drivers include the expansion of catch-and-release tournaments, kayak fishing, online and regional fishing events, mobile payment adoption, conservation-friendly scoring, sponsor visibility, and live leaderboard engagement for anglers and audiences. Business opportunities mainly come from SaaS subscriptions, per-event service fees, payment processing, premium judging tools, live scoring packages, white-label tournament systems, sponsor advertising, and data services. Providers with strong mobile submission, anti-cheating verification, offline weigh-in support, flexible scoring rules, and multi-event series management are better positioned to capture growth.

LPI (LP Information)' newest research report, the “Fishing Tournament Software Industry Forecast” looks at past sales and reviews total world Fishing Tournament Software sales in 2025, providing a comprehensive analysis by region and market sector of projected Fishing Tournament Software sales for 2026 through 2032. With Fishing Tournament Software sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world Fishing Tournament Software industry.

This Insight Report provides a comprehensive analysis of the global Fishing Tournament Software landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyses the strategies of leading global companies with a focus on Fishing Tournament Software portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms’ unique position in an accelerating global Fishing Tournament Software market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Fishing Tournament Software and breaks down the forecast by Tournament Format, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Fishing Tournament Software.

This report presents a comprehensive overview, market shares, and growth opportunities of Fishing Tournament Software market by product type, application, key players and key regions and countries.
