## Abstracts

The global Five-Axis CNC Gantry Machining Center market size is predicted to grow from US\$ 613 million in 2025 to US\$ 1005 million in 2032; it is expected to grow at a CAGR of 7.5% from 2026 to 2032.

The five-axis CNC gantry machining center is a high-end CNC machine tool. Based on the gantry-type high-rigidity structure, it realizes high-precision machining of complex spatial surfaces through the linkage control of the X/Y/Z linear axis and the A/B rotary axis. Its core feature is the five-axis synchronous motion (such as the spindle head can be tilted  $\pm 110^\circ$ ), and with the RTCP (tool tip following) function, it can complete multi-angle cutting (such as impeller blades, aircraft engine casings) without adjusting the workpiece clamping, and improve the machining accuracy to  $\pm 0.005\text{mm}$ , and the efficiency is 40%-60% higher than that of three-axis equipment. The equipment is widely used in aerospace (titanium alloy structural parts), automotive molds (integrated die-casting cavity), energy equipment (nuclear power reactor inner wall) and other fields.

The market for five-axis CNC gantry machining centers is expanding at a high speed, with the core driving force coming from the fields of aerospace, new energy vehicles and energy equipment. On the technical side, direct-drive swing-head milling heads and thermal deformation compensation systems have boosted machining efficiency by 50%, but core components (CNC systems, high-precision bearings) still rely on companies such as Germany's Siemens and Japan's FANUC. In terms of regional structure, Europe and the United States dominate the high-end market, and China is accelerating domestic substitution through policy support. Future trends focus on composite processing (integrated laser cladding/3D printing) and intelligent upgrades (AI process optimization reduces programming time by 30%), but high costs (equipment investment

payback period of 3-5 years) and a shortage of technical talent are still bottlenecks for popularization.
