The five-axis drilling and tapping machining center is a high-performance CNC equipment that integrates drilling, tapping and five-axis linkage technology. It can realize simultaneous processing of multiple surfaces of the workpiece and is particularly suitable for the manufacture of complex parts in industries such as aerospace, precision molds, medical devices and 3C electronics. The machine tool uses the three linear axes X, Y, and Z to link with the two rotary axes A, C or B, C, so that the tool can approach the workpiece from any angle, and complete multi-faceted and multi-angle processing tasks in one clamping, greatly improving processing efficiency and surface quality. Its high-rigidity spindle, high speed, fast tool change system and intelligent tapping function make it particularly outstanding in high-precision and high-efficiency batch processing.
