Fixed Rooflight is a non-opening glazing unit installed on flat or pitched roofs to introduce natural daylight into interior spaces without providing ventilation. These rooflights are designed to be permanently sealed, offering enhanced thermal efficiency, improved security, and minimal maintenance due to the absence of moving parts. Constructed with high-performance glazing—such as double or triple-glazed units with low-emissivity coatings—and thermally broken frames, fixed rooflights are ideal for areas where additional light is desired without the need for airflow, such as stairwells, hallways, and living rooms. Their sleek, minimalist design allows for seamless integration into various architectural styles, enhancing both residential and commercial buildings by creating brighter, more inviting environments.
